INDUSTRY PROSPECTUS AND OPPORTUNITIES

JW MARRIOTT • AUSTIN, TX

JULY 24-26, 2025

Fellows Bootcamp +
Structural Imaging Bootcamp
for the Heart Team / July 23rd

Cardiovascular Innovations (CVI) 2025 is a world-class meeting focused on state-of-the-art therapy for peripheral, coronary, and structural heart disease. More than 200 faculty are confirmed and will present during the 3-day meeting. The conference is designed to meet the needs of cardiologists, surgeons, physicians, trainees, investigators, and allied health care staff, who participate in the care of these patients. The focus of the conference is on innovative health care solutions to optimize the delivery of care for these patients.

All industry partners are welcome to participate and support the activities in this prospectus. Due to the small number of these available opportunities, the program committee will evaluate and determine the schedule of events with consideration given to the timing and level of support. Final decisions on partnerships for these opportunities will be determined in early 2025.

Booths must comply with IAEE guidelines and exclusively promote education and therapies of interest to health care professionals. Support for exhibitors, beginning in June and continuing on-site during the meeting, will be provided. Cancellations must be received by June 1, 2025, in accordance with the cancellation policy (see application form).

THE MEETING WILL BE HELD:
